

Geospatial & Space Technology Department Holds Historic Two Geospatial Engineering Camps in 2018

Geospatial & Space Technology Dept. held historic two historic Geospatial Engineering Camps in 2018, Unit FGE400, in June and November 2018 at the **University of Nairobi** Kibwezi Field Station in Kibwezi.

The Geospatial Engineering Camps were held in June 2018 and November 2018, to cater for the double intake groups of freshers admitted by the **Geospatial & Space Technology Department** and the **University of Nairobi** in January, 2014. and September, 2014 respectively.

FGE400 is a mandatory unit that takes students through various project-type Geospatial Engineering processes as would be expected in real life, under the guidance of both Lecturers and Technical Staff. It is a unit that aims at giving students real life experiences and geared towards the molding of work ethic and the professionalism of a Geospatial Engineer.
